

CENERONE

ASHTRAY

The CENERONE ashtray has been designed for the specific collection of cigarette ends separately from other refuse, respecting the law in force on the processing of this particular type of waste.

The container is asymmetric, completely closed and anti-rain; it is fitted with an upper cigarette stubbing plate with intake holes on both sides of a diameter that prevents use for other types of waste.

Inside, there is a removable container, closed by a special lock with a triangular key, which is removed in complete safety facilitated by the external handle.

CODE	1101009
DESIGN	A.U.ESSE srl
PATENT	Exclusive property A.U.ESSE S.r.l.
SIZE	Structure 320 x 150 mm - Height 1100 mm - Height of access 900 mm Volume of base 500 x 420 mm
