

ECO ISOLA with four bins

SEPARATED WASTE COLLECTION CONTAINER

Eco-Isola is a simple, effective and agreeable proposal for the promotion of separated waste collection in public areas.

It consists of a central steel support pole, available in both the version to fix in the ground and that with the plates with holes for anchoring to the floor, with three bins 350 mm in diameter which induce the separation of the waste through attractive colours.

The visibility of the waste collected enables the user to find the right bag intuitively.

CODICE ARTICOLO	1101048
DESIGN	A.U.ESSE srl
