

ECOPOLI with cover and ashtray

WASTE BIN OR CONTAINER FOR SEPARATED WASTE

Container with innovative design usable as both a waste bin and container for separated waste.

Version with metal bad weather protection cover and removable ashtray.

The attractive diamond shape has minimal volume and excellent for multiple aggregations of containers. The front hatch can be opened using the special lock and triangular key.

The high quality of the material used and the production technology are an absolute guarantee of functionality and long life.
