

QUICKY BIN

“TRAVELING” BIN FOR EVENTS, DEMONSTRATIONS, AND OTHER INSTALLATIONS

The bin is made of two interlocking pieces and a double opening ring, crafted from sturdy galvanized sheet steel. These features allow for quick and intuitive assembly while also ensuring maximum strength and stability, offering complete flexibility of use for a wide range of installations.

Thanks to its unique design, Quicky Bin is fully inspectable by security authorities for placement in "sensitive" locations or events.

The bin can be customized according to customer needs, with color and graphics identifying a message, a logo and/or a waste fraction.

Quicky Bin is absolutely sustainable, as at the end of its long lifespan, it can be completely disassembled, and every single component is 100% reusable or recyclable.

ITEM CODE	1109400
DESIGN	CONCEPT DESIGN: Mario Scotti – Davide Masoero IMPLEMENTATION PROJECT: A.U.ESSE srl
PATENT	Esclusive property of A.U.ESSE srl PATENT PENDING – REGISTERED DESIGN
DIMENSIONS	Height and imission item mm. 900 – overall size mm. 500 x 500
MATERIALS	Cross-support structure components in 6 mm thick galvanized steel sheet. – Double bag holder ring in 3 mm thick galvanized steel sheet.
PAINTING	Polyester powder for outdoor useTGIC FREE QUALICOAT
COLOR	According to customer needs
CUSTOMIZATION	Application of graphics indicating the type of waste or other messages
NOMINAL CAPACITY	Lt. 100
WEIGHT	kg. 20
PACKAGING	Pallet with cardboard packaging
