

## ECO 1.0 with cups stacker

### CUP CONTAINER

ECO 1.0 is a waste bin featuring a sleek and linear design, engineered to blend seamlessly into any public or private environment. Thanks to its rectangular footprint, the module takes up minimal space and allows for the easy side-by-side placement of multiple units from the same range.

The version dedicated to the disposal of compostable cups is ideal for break areas: the specific insertion holes guide the user toward immediate and correct disposal.

Key Features:

- **High Capacity:** The interior houses six tubes capable of holding up to 167 cups each, complemented by two dedicated slots for stirrers.
- **Fast Maintenance:** Emptying the bin is extremely simple for maintenance staff. Upon lifting the lid, waste remains neatly collected within the internal bag, preventing littering and ensuring maximum hygiene.
